EDUCATION

- **Bachelor of Science (Computer Science)**
Rajamangala University of Technology
Suvarnabhumi, Hantra Campus
2016 - 2019
- **Vocational Certificate in Information Technology**
Phra Nakhon Si Ayutthaya Technical College
2013 - 2016

TECHNICAL SKILLS

- **PROGRAMMING LANGUAGES**

Javascript, Typescript, Go, SQL, HTML, CSS, SCSS

- **FRONTEND**

Vue.js, Angular

- **BACKEND**

Node.js, Express.js, NestJS

- **DATABASE**

Microsoft SQL Server, MongoDB, MySQL

- **ORM**

Prisma

- **CLOUD & DEVOPS**

Docker, Google Cloud Platform (Cloud Run, Cloud SQL, Cloud Storage), Git, GitHub, GitLab, GitHub Actions, GitLab CI/CD

- **TOOLS**

VSCode, Postman (API Testing), Figma, Claude Code

- **CURRENTLY LEARNING**

React, PostgreSQL, GraphQL, Go

LANGUAGES

- Thai, English

PROFESSIONAL SUMMARY

Software Developer with over 7 years of experience. I started my career with 2 years of full-stack development before focusing on backend development with the Node.js ecosystem (Express.js, NestJS, TypeScript) for more than 5 years.

I design and develop REST APIs, databases and business logic for production systems, with a strong focus on performance, stability and maintainability so they can be supported and extended over the long term. Drawing on this work experience, I understand systems end to end – from frontend and backend development to production deployment on Google Cloud Platform (Cloud Run, Cloud SQL) using Docker.

WORK EXPERIENCE

PROGRAMMER (BACKEND DEVELOPMENT)

Auto Fast Co., Ltd

2021 - Present

- Designed system architecture and flow diagrams using Figma, and developed REST APIs for end-to-end integration with frontend applications.
- Developed backend services for web applications using Node.js and NestJS.
- Designed and developed databases and business logic for applications.
- Deployed applications to Google Cloud Run using Docker.
- Managed file storage using Google Cloud Storage.
- Maintained and supported production systems.
- Troubleshoot issues and bugs, performed system maintenance, and optimized software performance.

PROJECT

- Automotive Service Center (POS): Managed customers, vehicle information, products and inventory, purchase orders, goods receiving, work orders, reporting (Excel, PDF), and dashboards.
- Pricelist Management: Implemented multi-level price approval workflows with email notifications and price data export.
- E-Learning: Implemented authentication via SMS/Email OTP, training video playback, exam result recording, ranking calculation, and access control management.

SOFTWARE DEVELOPER

Cyber Advance System and Network Co., Ltd

2019 - 2021

- Analyzed and designed systems using Microservice Architecture.
- Developed full-stack web applications by designing REST APIs with Node.js and developing user interfaces with Angular.
- Designed and managed NoSQL databases using MongoDB.

FREELANCE PROJECT

Transport Management POS

- Analyzed customer requirements and business needs, and collaborated with the team to design the overall frontend and backend system architecture using Figma.
- Developed backend services using NestJS and managed the database using Prisma.
- Deployed the system to production on Google Cloud Platform using Docker.
- Utilized Google Cloud Run, Cloud SQL, and Cloud Storage.
- Delivered the system to the customer for production use according to the agreed scope.
